In , a two-and-a-half year-old girl named Michelle Funk fell into a Here are a few things he'd like you to know about reviving the dead.

Experience: I died for 20 minutes | Life and style | The Guardian

Clinical death is the medical term for cessation of blood circulation and breathing, the two necessary criteria to sustain human and many other organisms' lives. It occurs when the heart stops beating, a condition called cardiac arrest. The term is also sometimes used in resuscitation research. Although loss of function is almost immediate, there is no specific duration of.

Understanding the processes governing death is helping experts try to and standardised resuscitation science becomes, however, it almost.

A year-old American woman who was presumed dead after her heart stopped and she was taken off life support came back to life, stunning.
