This report presents the attractive structures and physiological activities of major natural products which we have isolated and characterized. The first proposed structure was corrected using synthetic chemistry techniques devised by other researchers.

Thesereviews, written by eminent authorities, cover a wide Bioactive Natural The area was only known to the chief of a local tribe for the purpose of collecting arrow-poison, and researchers were told that locals did not go near the area, believing it to be cursed. We do not know which organism actually produces halichondrins, although many laboratories have isolated and cultured microorganisms from inside sponges. In fact, Pettit

and M. WenextfocusedonOkinawanPteriapenguin.I also thank all of my co-workers who participated in the research presented. Please click the link in that email to activate your subscription.
