Though neurology is a complex subject, Gazzaniga does a very good job of keeping it understandable. Of course Gazzaniga offers a bit more persuasion than a stinging yardstick, an alarmingly florid complexion and a peculiar wardrobe. Gazzaniga thinks consciousness is an emergent property. The interpreter process "fudges," and we take it for truth. And in this lies the core value of the book. Gazzaniga gives us a wonderful, thought provoking book which forces the reader to examine complex systems and the ways in which they apply to brain function.

Hardcover pages. Abandoning the Concept of Free Will, 5. These rest is just explaining neuroscience to a lay audience. Gazzaniga thinks that scientific experimentation on this hypothesis has pretty much ruled it out as hogwash.
